

Principal, interest, APR, fees, and total cost

Cost comparison

Premium lesson companion

Teaching brief • applied vocabulary • guided workbook • knowledge check • answer guide

Name _____

Date _____

Principal, interest, APR, fees, and total cost

Payment amount alone can hide cost. Principal, interest, APR methodology, origination charges, recurring fees, and timing all shape the obligation.

The deeper idea

A stated rate is one component of cost. Origination, closing, broker, documentation, maintenance, late, prepayment, and third-party charges can change the comparison.

Learning objectives

- Explain principal using the lesson's governing facts.
- Distinguish APR from an assumption or promotional summary.
- Show how finance charge changes cost, timing, control, responsibility, or risk.
- Complete the cost comparison using traceable source information.

Vocabulary in action

principal	Locate it in source material and state what it measures or governs.
APR	Use it to make the comparison concrete instead of relying on a label.
finance charge	Name who carries responsibility, what triggers it, and which control makes it visible.

Move from information to a responsible next step.

1. Define the exact question

State the purpose, deadline, and consequence of delay. Connect the question to this lesson and its governing evidence.

2. Gather governing evidence

Collect current agreements, statements, official disclosures, operating records, or program instructions. Record the source and date.

3. Apply the vocabulary

Locate principal, APR, and finance charge in the real document or process. Translate each into a dollar, date, action, control, or responsibility.

4. Test a difficult case

Change one important assumption - timing, volume, cost, income, access, or support - and explain whether the plan still works.

5. Record the decision

Choose proceed, revise, compare, seek qualified review, or stop. Name the next action, its owner, and the review date.

Applied scenario

A learner must make this decision this month. The learner gathers governing records, locates principal, APR, and finance charge, and completes the assignment. The decision pauses if the difficult-case test exposes an obligation or operating risk that cannot be managed.

Cost comparison

Create a side-by-side cost table using identical borrowed amounts and clearly stated assumptions.

Purpose: What exact decision does this lesson support?

Evidence: Which source documents prove the facts? Include dates.

Terms: Where do principal, APR, and finance charge appear, and what does each change?

Stress-test and decision record

Stress test: Which assumption is most fragile, and what happens if it fails?

Decision record: What is the next action, who owns it, and when will it be reviewed?

My recorded status
☐ Proceed ☐ Revise ☐ Compare ☐ Seek qualified review ☐ Stop

Confirm your understanding.

1. State the central teaching in your own words.

2. How do principal and APR work together?

3. What evidence is strong enough to use?

4. What would make the plan pause?

5. What belongs in the finished assignment?

Compare reasoning, not just wording.

1. State the central teaching in your own words.

A stated rate is one component of cost. Origination, closing, broker, documentation, maintenance, late, prepayment, and third-party charges can change the comparison.

2. How do principal and APR work together?

Define each, locate both in source material, and explain their combined effect on the decision.

3. What evidence is strong enough to use?

Current, relevant, traceable information from an agreement, statement, official source, operating record, or qualified professional.

4. What would make the plan pause?

A missing governing fact, unsupported claim, unmanageable stress case, or inability to explain the responsibility attached to finance charge.

5. What belongs in the finished assignment?

Purpose, sources, term definitions, comparison or calculation, difficult-case result, unanswered questions, responsible owner, and review date.

Education-only boundary
