Connect capital use to cash flow

Outside capital creates future obligations. Before using it, define the use, amount, timing, expected benefit, payment source, stress case, and alternatives.

The deeper idea

An obligation is supportable only when a named cash source remains available after essential operations. Base, cautious, and severe cases reveal dependence on perfect conditions.

Learning objectives

- Explain payment source using the lesson's governing facts.
- Distinguish required payments from an assumption or promotional summary.
- Show how stress test changes cost, timing, control, responsibility, or risk.
- Complete the provider questions using traceable source information.

Vocabulary in action

payment source	Locate it in source material and state what it measures or governs.
required payments	Use it to make the comparison concrete instead of relying on a label.
stress test	Name who carries responsibility, what triggers it, and which control makes it visible.

Move from information to a responsible next step.

1. Define the exact question

State the purpose, deadline, and consequence of delay. Connect the question to this lesson and its governing evidence.

2. Gather governing evidence

Collect current agreements, statements, official disclosures, operating records, or program instructions. Record the source and date.

3. Apply the vocabulary

Locate payment source, required payments, and stress test in the real document or process. Translate each into a dollar, date, action, control, or responsibility.

4. Test a difficult case

Change one important assumption - timing, volume, cost, income, access, or support - and explain whether the plan still works.

5. Record the decision

Choose proceed, revise, compare, seek qualified review, or stop. Name the next action, its owner, and the review date.

Applied scenario

A learner must make this decision this month. The learner gathers governing records, locates payment source, required payments, and stress test, and completes the assignment. The decision pauses if the difficult-case test exposes an obligation or operating risk that cannot be managed.

Current, relevant, traceable information from an agreement, statement, official source, operating record, or qualified professional.

4. What would make the plan pause?

A missing governing fact, unsupported claim, unmanageable stress case, or inability to explain the responsibility attached to stress test.

5. What belongs in the finished assignment?

Purpose, sources, term definitions, comparison or calculation, difficult-case result, unanswered questions, responsible owner, and review date.
