# Compare common deposit accounts

Checking, savings, money market deposit accounts, and certificates differ in access, yield, limits, and purpose.

## The deeper idea

Checking, savings, money-market deposit accounts, and certificates solve different access problems. Yield matters only alongside liquidity, minimums, penalties, and purpose.

## Learning objectives

- Explain checking using the lesson's governing facts.
- Distinguish APY from an assumption or promotional summary.
- Show how certificate of deposit changes cost, timing, control, responsibility, or risk.
- Complete the fee review sheet using traceable source information.

## Vocabulary in action

|                        |                                                                                        |
|------------------------|----------------------------------------------------------------------------------------|
| checking               | Locate it in source material and state what it measures or governs.                    |
| APY                    | Use it to make the comparison concrete instead of relying on a label.                  |
| certificate of deposit | Name who carries responsibility, what triggers it, and which control makes it visible. |

# Move from information to a responsible next step.

## 1. Define the exact question

State the purpose, deadline, and consequence of delay. Connect the question to this lesson and its governing evidence.

## 2. Gather governing evidence

Collect current agreements, statements, official disclosures, operating records, or program instructions. Record the source and date.

## 3. Apply the vocabulary

Locate checking, APY, and certificate of deposit in the real document or process. Translate each into a dollar, date, action, control, or responsibility.

## 4. Test a difficult case

Change one important assumption - timing, volume, cost, income, access, or support - and explain whether the plan still works.

## 5. Record the decision

Choose proceed, revise, compare, seek qualified review, or stop. Name the next action, its owner, and the review date.

### Applied scenario

A learner must make this decision this month. The learner gathers governing records, locates checking, APY, and certificate of deposit, and completes the assignment. The decision pauses if the difficult-case test exposes an obligation or operating risk that cannot be managed.

# Fee review sheet

Assign each savings goal to an account type and explain the tradeoff.

Purpose: What exact decision does this lesson support?

|  |
|--|
|  |
|  |
|  |

Evidence: Which source documents prove the facts? Include dates.

|  |
|--|
|  |
|  |
|  |

Terms: Where do checking, APY, and certificate of deposit appear, and what does each change?

|  |
|--|
|  |
|  |
|  |
|  |

# Stress-test and decision record

|                                                                              |
|------------------------------------------------------------------------------|
| Stress test: Which assumption is most fragile, and what happens if it fails? |
|                                                                              |
|                                                                              |
|                                                                              |
|                                                                              |
|                                                                              |

|                                                                                      |
|--------------------------------------------------------------------------------------|
| Decision record: What is the next action, who owns it, and when will it be reviewed? |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |

|                                                                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>My recorded status</b>                                                                                                                                                      |

# Confirm your understanding.

1. State the central teaching in your own words.

---

2. How do checking and APY work together?

---

3. What evidence is strong enough to use?

---

4. What would make the plan pause?

---

5. What belongs in the finished assignment?

---

# Compare reasoning, not just wording.

## 1. State the central teaching in your own words.

Checking, savings, money-market deposit accounts, and certificates solve different access problems. Yield matters only alongside liquidity, minimums, penalties, and purpose.

## 2. How do checking and APY work together?

Define each, locate both in source material, and explain their combined effect on the decision.

## 3. What evidence is strong enough to use?

Current, relevant, traceable information from an agreement, statement, official source, operating record, or qualified professional.

## 4. What would make the plan pause?

A missing governing fact, unsupported claim, unmanageable stress case, or inability to explain the responsibility attached to certificate of deposit.

## 5. What belongs in the finished assignment?

Purpose, sources, term definitions, comparison or calculation, difficult-case result, unanswered questions, responsible owner, and review date.
